AMS Analysis Software

James Allan

Major changes since last year

- Improved the MS graphs and the displayed data
- Pre/post correction macros
- Improved stick recalculation
- Shortened naming structure

- Bug fixes, lots of bug fixes...
Current work in progress

- MS Graph aesthetics
- Non-integer $m/z$ values

Stuff on the horizon

- Rebinning of size-resolved data
- Analysis of JMS data
Suggestions anyone...?

- Greyscales on negative values in image plots
- Selective loading
- ‘Flush’ button
