

FORM TO SPECIFY INPUT DATA FOR
TERRAIN (OCEAN BOTTOM) MODEL GTOPO¹

This model represents the terrain (ocean bottom) by a two-dimensional Fourier transform.
The model does not yet exist.

Specify—

the model check for GTOPO = _____ 5.0 _____ (w300)

the input data-format code = _____ (w301)

an input data-set identification number = _____ (w302)

an 80-character description of the model with parameters:

and the profile values:

the number of points in the profile -2 = n = _____

the profile:

¹OTHER MODELS REQUIRED: Any terrain (ocean bottom)-perturbation model. Use NPBTM if no perturbations are desired.
